

Electronic Content Delivery

Notices^e

Electronic Notice Presentation

MSI Notices^e

MSI Notices^e is an optional add-on to MSI's e-statements solution that electrifies the presentation of daily or ad-hoc notices to a financial institution's customers via its online banking website.

- Overdrafts and NonSufficient Funds
- Loan Payments Reminders
- CD Maturity
- Safe Deposit Box Renewal
- All other types of Notices

Reduced Postage Costs

All Notices that might otherwise be distributed to customers by printing and mailing can be more immediately, directly, and verifiably provided to customers online, and at a substantially lower cost.

Financial institutions merely transmit the notice output of their core, exceptions, or other systems to MSI via a secure file transfer. Using sophisticated notice composition capabilities, MSI automatically incorporates the key data into any number of completely customizable templates, and MSI makes the notices appear online, embedded within the same user interface as electronic statements. Customers get all of the critical account information they need in one place

Easy Enrollment

Getting customers enrolled in eNotices is easy. Customers can enroll online as a separate process, or bundled with the eStatement enrollment process.

Verifiable Distribution

When a new notice is posted, customers receive an email that a new notice is waiting within online banking.

Users are forced to acknowledge the reading of newly posted notices immediately upon their next logon, providing an audit trail that important account messages have been received.

Bank personnel can even attach electronic sticky notes to individual notices on actions taken, for later research.

Notices^e

Key Capabilities and Benefits

- Patent-pending Flash user interface creates a fluid, highly interactive viewing experience, without launching separate PDF viewers.
- Operates as an online, Software-as-a-Service (SaaS) application over the Internet.
- Branded for the financial institution, appearing as embedded within your online banking application, with Single Sign-On (SSO) capability.
- Notice text can be linked to other objects, such as particular check images or policy statements.
- Online enrollment and email notification to customers that notice is available to be viewed upon next login.
- Customizable disclaimers and email alerts on key event triggers.
- Verification feature forces customers to acknowledge reading of notices as first order of business upon next online banking logon.
- Notices can be pre-routed electronically to Personal Bankers or CSRs for mitigation, attaching of electronic sticky notes, or other intervening actions.
- MSI offers printing and mailing of paper notices from the same file, making MSI your one-stop-solution for all of your notice delivery needs.
- The most sophisticated notice composition capabilities available.
- Through MSI's CustomerConnect™ 1:1 marketing solution, optional incorporation into notices of targeted marketing messages and graphics.

Powerful Online Portal for Administrators: AccessDirect™

Bank administration of MSI Notices^e operates modularly under MSI's Access Direct™ solution portal, providing single sign on and cross navigation for financial institution users or CSR's, who might have access to MSI's other online applications.

MSI AccessDirect™ is your one-stop solution for accessing the wide array of MSI products and services through a unified and centralized online portal. With enterprise-class security features, AccessDirect™ allows organizations to ensure sensitive data is restricted to those who need to view it.

AccessDirect™ is not only a portal to access MSI products and services, but also a powerful tool to communicate information between MSI and client users, this serves as a focus for communication and collaboration within client organizations by providing powerful intranet functionality.
